COMPANY	PROFILE	MEETING
<b>Beaver Metals Ltd</b>	Beaver Metals is a trading and scrap process company based in Birmingham, trading in all grades of non-ferrous scraps, including copper, brass, bronze, aluminium, stainless steel, tin and lead alloys, nickel alloys, titanium alloys, cables, motors and transformers. Reusable items in sheets, bars, tubes and plates, prime metals, ferro alloys and LME brands. Beaver Metals is currently looking to have a partner for the Portuguese market. - <a href="http://www.beavermetals.com">www.beavermetals.com</a>	
<b>PMG Technical Services Ltd</b>	PMG Technical Services is a company specialised in areas such as odour control, effluent treatment and other similar plant engineering requirements. The company is exporting air pollution control equipment – gas scrubbing and odour control plant for the chemical and wastewater industry. Their installations are built specifically to meet customer's exact circumstances. They also provide expert advice in order to make sure the customer achieves the intended results. All of this is backed up by a fully equipped, modern manufacturing facility based in Central England and supported by a full design service. PMG is seeking a Portuguese partner with extensive contacts in the WasteWater and/or Chemical industry. - <a href="http://www.pmgtech.co.uk">www.pmgtech.co.uk</a>	
<b>Intellitect Water Ltd</b>	Intellitect Water Ltd has developed multi-parameter, solid state, water quality instrumentation for use by water utilities, food and drink manufacturers and industrial users of water. They have developed two ground breaking water monitoring devices - the Intellisonde™ and Intellical™. Furthermore by utilising the latest third party communication technologies, remote data retrieval of up to 12 measures and can be transmitted to anywhere in the world in real time. Intellitect Water is currently looking to have a partner for the Portuguese market. – <a href="http://www.intellitect-water.co.uk">www.intellitect-water.co.uk</a>	

COMPANY	PROFILE	MEETING
<p><b>Taylor</b></p>	<p>Taylor is a company specialised in providing flexible, robust and sustainable recycling and waste containment solutions. Taylor are the market leaders in providing waste and recycling containers in the UK. From the iconic Taylor <u>Continental</u><sup>®</sup> to <u>recycling</u> innovations such as <u>node</u><sup>°</sup>, the company's continued product development boost public participation in recycling. Taylor has its own R&amp;D facility which enables them to create product modifications and evaluate them on-screen without the associated costs of failing prototypes. - <a href="http://www.taylorbins.co.uk">www.taylorbins.co.uk</a></p>	
<p><b>Omnia Recycling Ltd</b></p>	<p>Offers a full closed loop recycling solution for mixed plastic waste. Their technology allows to take mixed municipal plastic waste as varied as margarine tubs, yoghurt pots, pop bottles, carrier bags, packaging, films, shrink wrap and crisp packets and recycle them into totally sustainable, cost effective, green procurement building and agricultural products. Omnia Recycling is looking, in the short term, for distributors and in the long term for partners to set up plants with across the EU. - <a href="http://www.omniarecycling.co.uk">www.omniarecycling.co.uk</a></p>	
<p><b>Veolia Water Solutions and Technologies</b></p>	<p>Veolia Water Solutions &amp; Technologies (VWS) is the technical subsidiary of Veolia Water and the World Leader in water treatment. VWS is a specialist in engineering and turnkey design/build projects. VWS also creates a range of patented, technological solutions to treat water, wastewater, sludge and odour for both municipal and industrial customers. In addition, Veolia Water Solutions &amp; Technologies offers a complete range of associated services to ensure the efficient and long-term operation of installed equipment. - <a href="http://www.veoliawaterst.co.uk">www.veoliawaterst.co.uk</a></p>	
<p><b>Gas Data Ltd</b></p>	<p>Gas Data develops its own technology of Gas and gas flow analysers and then integrate it into products focused on their application and the customers requirements. More recent developments have seen Gas Data's biogas analysers set new standards for the permanent monitoring of biodigester output gases allowing efficient control of energy generation from this highly valuable source of renewable energy. Gas Data philosophy is one of long term commitment, both to the instrument and to the customer. Every instrument sold is supported by factory service and calibration. - <a href="http://www.gasdata.co.uk">www.gasdata.co.uk</a></p>
